

The plot displays the D/L rate (kBytes/S) on the y-axis (0 to 600) against the Date on the x-axis. The x-axis labels are '00:00' repeated for each day from 2007-06-27 to 2007-07-04. A single data point is plotted as a red '+' marker at approximately 230 kBytes/S on 2007-06-28. A legend in the top right corner indicates that the red '+' marker corresponds to the file '2007\_0627\_171959'.
